Preface

If we could first know where we are and where we are tending, we could better judge what to do and how to do it.

Abraham Lincoln

The 2010-2011 FACT BOOK is to document the characteristics of Clayton State University and the factors that cause change in these characteristics, in order to inform strategic and long-range planning efforts. Established in 1969 in a park-like setting 15 minutes from downtown Atlanta, Clayton State University serves the metro Atlanta area as a hub for undergraduate education. Clayton State currently has more than 6,600 students and is ranked by U.S. News & World Report as having the most diverse student population among comprehensive baccalaureate-level colleges and universities in the Southeastern United States. A national pioneer in “ubiquitous computing” and a leader in on-line and distance education, Clayton State is one of only 36 “Notebook Universities” in the country, and was the third public university to require that each student have access to a notebook computer. Clayton State is the only academic institution in the Southeast with a world-class recital hall (Spivey Hall) on campus. Clayton State is also the only university in the country adjacent to both state and national archives facilities. The University currently offers over 30 baccalaureate degree programs and 8 graduate programs with several new programs under development. The University’s Athletics program features 10 sports and competes at the NCAA Division II-level in the Peach Belt Athletic Conference.

Every effort has been made to ensure that the data contained in this document are accurate and easy to use. Prior to use of the data in policy development and/or analysis, you may wish to contact Jillian Jones or me to ensure that you receive any post-publication changes.
